

Reprints of Western Books by A. Leslie Scott Published After 1980

ANDERS N. NILSSON, Nordmaling, Sweden

[Version 25 November 2024]

The publication of the many western novels written by A. Leslie Scott (1893-1974) started with the pulp magazines in the 1930's, and was already from 1936 accompanied by hardcover book editions such as *Black Gold* and *Rider of the Dim Trails* (Nilsson & Reasoner 2024). Starting in 1950 with *Guns of Mist River* and 1951 with *Frontier Doctor* plus a handful of titles as Pyramid Books, the transfer from pulp magazines to paperbacks was well on its way. The 1956 change of pseudonym from Jackson Cole to Bradford Scott in combination with the replacement of Jim Hatfield with Walt Slade as chief protagonist cemented the paperback as Scott's main medium for the distribution of his stories. The first Walt Slade paperback was Pyramid #178 *Texas Terror*, with 112 more of them waiting in line, ending in 1973 with *Border Daring* as #T2893 (all later numbers are reprints). The Pyramid paperbacks were from the start reprinted in Australia, and translated and reprinted especially in Scandinavia (Nilsson 2024). After the translated Walt Slade series had been ended in Scandinavia and the Netherlands in the 70's or early 80's, one would think that was the end of printing Scott's novels. Turned out that a third wave of publication was waiting behind the corner to get going, and this is what the third part of my Scott bibliography will focus on.

The third wave Walt Slade editions are of three different kinds. First out was the Norwegian paperback reprints, starting in the late 80's and continuing up to this very day. Then in the mid 90's followed in UK and USA reprints of many of Scott's novels in hardcover and softcover large print editions, chiefly marketed at libraries. Finally, eBooks started to be produced in the US near 2010, often combined with paperback reprint editions.

Norwegian translations

Two reprint paperback series including novels by Leslie Scott already published in Norwegian translation were started in the late 80's (see Nilsson 2024 for earlier Norwegian editions). First, the Danish Winther publisher in 1988 started their short series *Walt Slade* of ten books by Jackson Cole that was ended in 1989. This was also the year when the Norwegian publisher Fredhøi started their double-volume reprint series 2 *Gode Romaner* with double horse-shoes in the logo. The word "Dobbeltbok" was added to the name of the series from book #14, and then in 2004 from book #140 the name was changed to *Dobel Western*, a name still in use. The Danish Egmont group incorporated Fredhøi in 1992, and in 1996, from book #85, also the *Dobel Western* series. In 2002, from book #125, Egmont changed the publisher to Damm, a Norwegian publisher belonging to the Egmont group since 1984. Damm was in 2007 fused with Cappelan, another Norwegian publisher, into Cappelan Damm, and this publisher name was used for the *Dobel Western* series from book number 178 in

2008. Cappelen Damm is still running the series, with the first book for 2025 carrying the number 356. *Dobbel Western* is mixing many different authors, chiefly from USA, Australia and the UK. The series also mixes more classical authors, like Zane Grey and W.C. Tuttle, with newer ones like J.D. Hardin and Cole Weston. Altogether, 118 of the more than 700 novels are by Leslie Scott. Original titles here follow Nilsson (2024), although given differently in some of the books. *Dobbel Western* is one of the few western paperback series still being published in Norway, in the shadow of all the reprint series of the Morgan Kane novels by the former Norwegian author Kjell Hallbing writing as Louis Masterson. Cover scans back to 2014 and book #238 are on display at <https://cappelendamm.no/serie/Dobbel%20Western>.

American and British reprints and eBooks

Whereas almost all UK and US editions here listed are reprints of earlier book editions, two books by Leslie Scott that stand out are *Terror Stalks the Border, a Western Duo* (2002), and *The Texas Ranger, a Western Duo* (2005). In both books, one shorter Walt Slade story from the pulp magazine *Thrilling Western* is combined with one longer Jim Hatfield story from *Texas Rangers* magazine. The first book also has an interesting Scott biography written by Al Tonik. Of the Hatfield stories, *Lone Star Peril* had already been published as a Popular Library paperback in 1972, and *Terror Stalks the Border* had in 1953 been remade into the Pyramid paperback *Killer Country*. Of the two shorter stories, *Drums of Doom* was seemingly not earlier published in a book, whereas *Knight of the Silver Star* had been expanded into the 1960 Pyramid paperback *Lone Star Rider*.

As these books were not published in numbered series, book numbers here listed were taken from the title number part of the ISBN codes (see Wikipedia for details). The 13-digit codes start with the EAN prefix 978, absent from the 10-digit codes. The latter start with the language-group code, a 0 or 1 for English, followed by the publisher code, the title code, and a single digit checksum. Digit groups were earlier separated by spaces or hyphens, permitting a clear separation of the code groups. The current practice of presenting ISBN codes as a continuous string of digits makes the separation of the publisher and title codes more difficult as these codes have a variable number of digits. My interpretation of the publication codes involved are listed below. The supposed title numbers used in the list will thus match the last digits of the ISBN codes after that the last digit (the checksum) has been stripped. In my opinion, these numbers are very useful for matching a given ISBN code with its respective edition. The few eBooks missing ISBN codes instead have their Amazon numbers listed.

In the following list, the nationality of the publishers and their respective ISBN codes are as follows: (**UK**) AudioGO (408, 445, 4458, 4713), BBC Audiobooks (405, 4056, 408, 7540), Chivers (7540, 7541), F.A. Thorpe (7089, 78541), ISIS (7531), Robert Hale (7090), and (**US**) Amazon Encore (47780), Center Point (60285, 62899, 63808, 64358, 68324, 891641, 891643), Cutting Edge (95786), G.K. Hall (7838), Leisure Books (8439, 42850), Literary Licensing (25804, 25809, 25850), Thomas T Beeler (57490), Thomson/Gale (59414), Thorndike (4104, 7862), Wheeler (58724, 59722), Wildside Press (4794), and Wonder eBooks (61013).

After the original title follow for each more recent edition: the publication year, the author name and the name of the hero used in the edition within parenthesis, the name of the publisher, edition type, and finally the number. “Ditto” refers to titles and/or names being identical with the nearest older edition. Editions are separated into: (eb) eBooks, (hc) hardcover, and (sc) softcover including paperbacks. Original titles follow Nilsson (2024) with some updating.

Statistics

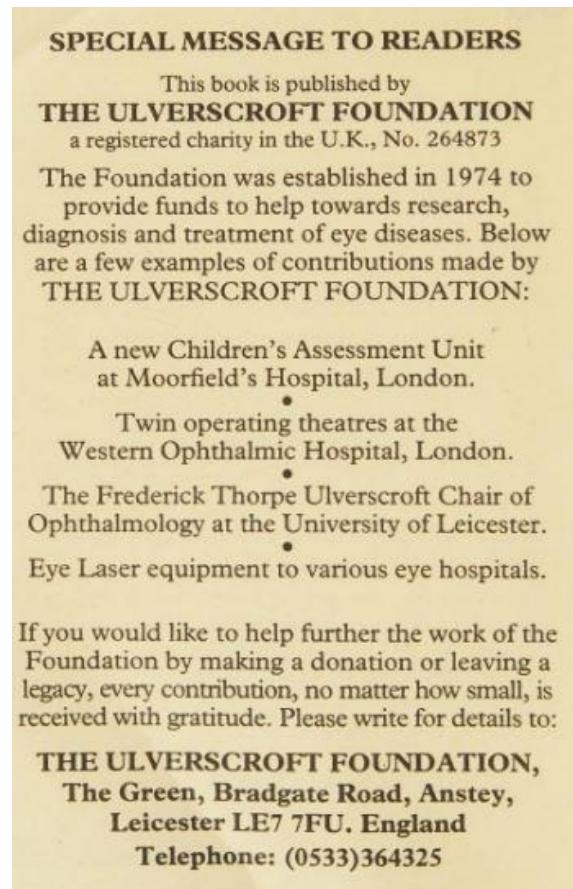

Nilsson (2024) recognized 185 different stories of novel-length by Leslie Scott published as books before 1980. After this date the Norwegian reprints amount to 116 stories, of which 12 have been published more than once. The corresponding combined UK and US score, including also eBooks, is 121 stories, only slightly higher than the Norwegian one. However, the number of editions in the original language is more than twice as many as the Norwegian ones. The main reason for the difference is the presence of separate UK and US editions.

There are still 73 of Scott's novels published as books that so far have not been reprinted after 1980. The majority of them are Walt Slade stories published as Pyramid paperbacks. Lack of material is thus not yet an excuse for not producing more eBooks based on Scott's stories.

Large print editions

As most UK and US books here listed are large print editions, primarily directed at the library market, I will take a closer look at this kind of printing, today a part of "inclusive literature", and including also Braille and audiobooks. Seemingly, the problems of commercialization of the inclusive segment in publishing are still not covered by scholars and require careful study. Starting with the publishers, a close cooperation between UK and US companies is evident. In the UK, large print publishing started with Ulverscroft in 1964, later including both a foundation and publishing firm. Associated printers here represented are F.A. Thorpe and ISIS. The other important publisher, Chivers, that established itself also in the US, chiefly produced audiobooks. Chivers was bought by BBC Audiobooks, part of BBC Worldwide, in 2001, using Chivers as an imprint up to 2004. BBC Audiobooks was sold to AudioGO in 2010, only to suspend their operations in 2013, and letting Ulverscroft take over the British scene.

US large print publishing has mostly been located to Maine. Today remains only two companies, the independent Center Point, and Thorndike, now part of the Gengale/Gale group. Both G.K. Hall and Wheeler have been used as imprints by Thorndike, that have published many of Scott's stories in close cooperation with the Chivers line of publishers. In fact, cooperation was so close that one and the same print run frequently included both UK

Page from the 1994 Linford Western Library edition of *Outlaw Roundup* with information on the Ulverscroft foundation.

and US editions, with separate ISBN codes listed together and books differing only in their covers. Most such cases included one hardcover and one softcover UK edition plus one softcover US edition. Seems this was a clever setup to reduce printing costs of the relatively small editions characterizing the large print editions.

The big question is of course why large print publishing included all these old pulp-style western stories by Leslie Scott? Thorndike alone in 2011 published a total of 1,100 books in large print format, most of them bestsellers or genre fiction including westerns (Bond 2011). At the time, Thorndike had 40 standing order series with the libraries, and my guess is that westerns was one of them. In this situation, one possible reason for printing old Scott stories is that they did get them cheap from John Tuska at the Golden West Literary Agency that handled the copyright issues. Center Point that was launched in 2000, published 336 books in 2011 and had 12 standing order plans (Bond 2011).

Seems library budgets are nowadays having problems to cover also all the eBooks. At the same time old men will soon no longer have nostalgic memories of reading Walt Slade or Jim Hatfield stories in their younger days. Most likely the libraries will not order so many of Scott's westerns in the near future, and the large print Texas Ranger era will soon be over, or survive in the more flexible eBook format.

National Association for Visually Handicapped
serving the partially seeing

As the Founder/CEO of NAVH, the only national health agency solely devoted to those who, although not totally blind, have an eye disease which could lead to serious visual impairment, I am pleased to recognize Thorndike Press* as one of the leading publishers in the large print field.

Founded in 1954 in San Francisco to prepare large print textbooks for partially seeing children, NAVH became the pioneer and standard setting agency in the preparation of large type.

Today, those publishers who meet our standards carry the prestigious "Seal of Approval" indicating high quality large print. We are delighted that Thorndike Press is one of the publishers whose titles meet these standards. We are also pleased to recognize the significant contribution Thorndike Press is making in this important and growing field.

The eBooks

Prologue Books was launched by F+W Media in 2012 for producing eBooks based on out-of-print novels in several genres, including westerns. Renamed to F+W in 2014, the company went into bankruptcy in 2019, and after that Simon & Schuster has been distributing the Prologue eBooks. Their western series included ten Jim Hatfield or Walt Slade titles by Leslie Scott.

Wildside Press is an independent publisher in Maryland launched in 1989 by John and Kim Betancourt. From 2017 and onwards, they have produced eleven eBook editions of Scott's Walt Slade novels.

Wonder Publishing Group was an independent publisher of eBooks launched in 2010 in Northville, Michigan. They produced eBooks from vintage SF, crime, and western paperbacks. Their output included four Walt Slade novels between 2010 and 2012. I don't think they lasted much longer.

Cutting Edge is an imprint of the US publisher Brash Books, specialized in crime and thrillers. They have so far published two Walt Slade novels, both as paperbacks and eBooks.

Altogether, 28 of Scott's novels have been published as eBooks, all of them in the US. No translations of Leslie Scott's novels have as far as I know been republished in the eBook format. In addition, Radio Archives Pulp Classics include eBooks of four full Texas Rangers issues with Hatfield stories by Scott as well as some other pulp magazines in which he was reprinted.
